Employment

June 2022 – Current Developer and data scientist ITAB AB

During my time at ITAB I have been working in different global projects requiring cooperation with people all over Europe. I have been working both with technical and business aspects of data management, BI and CRM.

My main tasks have been to configure the masterdata platform Profisee to ensure that the data imported from several different sources are matched and processed to be harmonized over the entire company. The harmonization process involves setting data KPIs together with business and ensure that the business requirements are fulfilled by preprocessing and importing the data into Profisee using SQL, configuring matching and data quality rules in Profisee and also develop export functionality in a specific C# application. Additionally, providing data quality reports using Power BI.

The application for exporting data from Profisee was a wrapper application for moving data from Profisee to Mulesoft, so I have also been working a lot with defining integration specifications and data mappings between different systems together with the integration team for Mulesoft.

From a business perspective, I was leading the business analysis for how the process of managing Supplier domain should work, a process that I also configured in Profisee.

Furthermore, I supported CRM team with Salesforce configurations and exporting and importing data to and from Salesforce.

Education

- 2019-2022 Högskolan i Skövde (Bachelor degree)
Program for Computer Science with a focus on system development.

Thesis: *Comparison of SQL and NoSQL Databases*

- Analyzed the differences in performance, scalability, and data structure between SQL and NoSQL databases.
- Conducted experiments to compare query performance and data consistency in different scenarios.

- 2014-2017 Västerhöjdskolan i Skövde
Technical high school with specialization in IT

Certificate

- Cisco Networking Academy
IT Essential
CCNA Routing and Switching

TechnicalSkills

- Java
- C#
- SQL
- Python
- C++
- Profisee
- Salesforce
- MDM

Additional Work Experience (before university degree)

Jan 2018 – Augusti 2019

Adecco – Konsult Volvo Cars Skövde

- *Assembled and installed motors on production lines.*
- *Worked in a fast-paced environment, ensuring precision and quality in assembly.*
- *Collaborated with a team to meet production targets efficiently.*
